CROP PHYSIOLOGY AND BREEDING
INVESTIGATIONS

July 5, 1924.

Dr. John H. Barnhart,
Librarian, New York Botanical Garden Library,
Bronx Park, New York.

Dear Dr. Barnhart:

I send you, herewith, a photostat copy of a Chronological List of the Dissertations of Charles Linnaeus, which I had prepared in the hope it would lead ultimately to our securing in this country a complete set of these valuable publications. According to the latest information at our disposal the New York Botanical Garden Library contains eighty original Linnean dissertations. If by good fortune you have more than this please let me know so the second issure of this list can be corrected accordingly.

Yours very sincerely,

Chairman of the Library Committee,
U. S. Department of Agriculture.

PREFACE TO THE CHRONOLOGICAL LIST OF THE DISSERTATIONS OF CHARLES LINNAEUS.

The dissertations of Linnaeus are of the utmost importance in determining the correct names to be applied to many of the commonest plants and animals. Almost all, if not all, of these dissertations were written by Linnaeus himself. On this point, B. Daydon Jackson the custodian of the splendid Linnean collection of the Linnean Society of London, says:[1]

"That Linnaeus regarded most of these exercises as his own may be learned from such instances as where he cited plants from Centuria 1(-2) Plantarum in the second edition of his Species Plantarum as first described in those parts, but without naming any author whatever. He plainly looked upon those productions as entirely his own."

Jackson also says:

"To determine how many of these one hundred and eighty-six dissertations entirely proceeded from Linné's pen is impossible. That such was the case with certain essays, we have his own word, and their contents also show that; others, such as Löfling's De gemmis arborum, Söderberg's Pandora et Flora Rybensis, Tillaeus's De varia febrium intermittentium curatione, are, on the contrary, exclusively the results of the respondent's own study and observation. But even these have certainly to some extent received the stamp and imprimatur of Linné, who completed and corrected them throughout before they were printed."

J. G. Acrel, a pupil of Linnaeus, tells how the dissertations were written, as follows:[2]

JUL 12 1924

---

1 Jackson, B. Daydon, Authorship in the Amoenitates Academicae, in Journal of Botany, 51:101-103 (no. 603, March, 1913).

2 Jackson, B. Daydon l.c. p. 102

"All disputations he [Linnaeus] wrote by dictating partly in Swedish, partly in Latin, which it was the task of the respondends to reduce to method and order; and although he did not trouble himself about the Latinity in them, he took care to intimate his opinion as to whether they were well written or the contrary. To write an essay thus needed scarcely three hours, for it was for him nothing but a lecture on the subject, which the respondent took down."

They were reprinted several times in the different editions of the Amoenitates academicae, but unfortunately many changes of names were made in these reprints. The Linnean Society in London has the original dissertations as changed and corrected by Linnaeus for reprinting.

In view of the changes made in the reprints, it becomes of great importance from historical and nomenclatorial standpoints to consult the original dissertations themselves. The aim of the present list is to locate all original editions of Linnean dissertations to be found in the libraries of the United States.

At first it was thought sufficient to list the botanical and zoological dissertations, but it has been found difficult to decide which dissertations to include and which to exclude from such a list. Accordingly the list has been prepared to cover all dissertations of Linnaeus.

The dissertations are listed in strict chronological order and are classified according to the list given in the catalogue of the Linnean Society of London, as

indicated by the small letter immediately below the serial number, as explained in the "Directions for Use."

The information regarding the dissertations is given in four or five paragraphs, as follows:

The first paragraph gives the serial number of the dissertation in strict chronologic order, the abbreviated Latin title in large type, and the full name of the candidate who defended the dissertation.

The second paragraph gives the abbreviated Latin title and the abbreviated name of the candidate (respondent) as given in the last edition of the Amoenitates academicae[1]; also the serial number in Roman numerals as given there, with the volume and page references.

The third paragraph gives the date when the dissertation was publically defended by the candidate, the place of publication, the number of unnumbered folios, the number of numbered pages, plates, etc., as given in Hulth's Bibliographia linnaeana.[2]

The fourth paragraph in some cases is a full literal quotation of any bibliographic notes given by Hulth; these notes are always in French. As many of the dissertations do not have any notes of this character by Hulth, this paragraph is often missing and its place taken by the next paragraph.

The fifth paragraph cites the page in Hulth where the dissertation is described, and notes whether any reviews ("Rev.") or translations ("Transl.") are cited by Hulth. At the end of this paragraph the serial number under which the dissertation appears in Pritzel's

---

1 Linnaeus, Carol. A., Amoenitates academicae...3 ed. curante C. J. C. D. (von) Schreber, Erlangen (Jo. Jacobi Palm), 8°, 10 vols., 1787-90.

2 Hulth, J(ohan) M(arkus), Bibliographia linnaeana, Matériaux pour servir à une bibliographie linnéene, Pt. I, Livaison I. Upsala, (Almquist & Wiksells Boktryckeri) 1907, gr. 8°, (6) + 170 pp., 11 plates.

Thesaurus litteraturae botanicae is given.[1]

On the right-hand margin of the page, opposite the title of the dissertation, are found abbreviations for the names of libraries which contain original editions of Linnean dissertations. A list of these libraries with the corresponding abbreviations is given on the page marked "Directions for Use."

In all, nine libraries in the United States are now known to contain original Linnean dissertations. The Library of Congress has ninety-nine, and in addition, ten duplicate copies; the New York Botanical Garden has eighty; Dr. Barnhardt's library has thirty; the Surgeon General's library twenty-nine; Gray Herbarium twenty-three; Department of Agriculture library twelve; John Crerar library twelve; Arnold Arboretum nine; and the library of Columbia University has one.

These nine libraries contain 305 copies of original editions of Linnean dissertations. Of these 167 are duplicates, leaving 138 different original dissertations out of a total of 186 that were published.

Of the sixty-three botanical dissertations all but two are to be found in American libraries; of the twenty-nine zoological dissertations, fourteen are missing; of

---

[1] Pritzel, G(eorg) A(ugust). Thesaurus literaturae botanicae ...? ed. Lipsiae (F. A. Brockhaus), 1872. 4°, (4)+576 pp.

the twenty-six dissertations on materia medica, six are missing; of the sixteen dissertations on natural history, seven are missing; of the eighteen economic dissertations, four are missing; and of the thirty-four medical dissertations seventeen are missing.

It is clear from the above summary that the botanical dissertations are best represented in this country, only two being lacking out of a total of sixty-three; the medical dissertations are most imperfectly represented, since seventeen out of thirty-four, or exactly one-half, are wanting.

The zoological dissertations are also very imperfectly represented in American libraries since fourteen out of a total of twenty-nine are wanting.

The present list amounts to a provisional check list of the Linnean dissertations. It is hoped to make a second edition of the list that will include all the Linnean dissertations in the original editions to be found in American libraries. All librarians and others interested are requested to send to the undersigned notes concerning dissertations not here reported.

In order to make the list more useful for reference, an index has been prepared to the titles of the dissertations, as in some cases they were changed when the reprints were made.

In preparing the original manuscript of this list, Miss Alice C. Atwood, reference librarian of the Bureau of Plant Industry, United States Department of Agriculture, contributed both ideas and facts and did much to make this list of value.

The difficult work of typewriting on two different machines in a form suitable for photostat reproduction was carried out very efficiently by Miss Mary J. Francis. Her finished typewritten copy has been photographed and from the original negative a number of positive copies have been prepared.

Walter T. Swingle,
Chairman, Library Committee,
U. S. Department of Agriculture.

April, 1923.

DIRECTIONS FOR USE.

The Linnean Dissertations are given here in strictly chronological order, based on the data given in Hulth, Bibliographia linnaeana.

These dissertations are divided into six classes, indicated by the small letters immediately below the serial number. These letters indicate the classifications of the Linnean Dissertations, given by the catalogue of the Linnean Society of London, as follows:

b. - botanical
e. - economic
m. - medica
z. - zoological
m.m. - materia medica
n.h. - natural history

The column to the right gives in abbreviated form citations to the libraries in which these dissertations are found in America. These libraries are as follows:

N.Y. - New York Botanical Garden, Bronx Park, New York, N. Y.
L.C. - Library of Congress, Washington, D. C.
Agr. - U. S. Department of Agriculture Library, Washington, D. C.
Bar. - Dr. J. H. Barnhart's Private Library, New York Botanical Garden, New York, N. Y.
J.C. - John Crerar Library, Chicago, Ill.
A.A. - Arnold Arboretum, Boston, Mass.
G.H. - Gray Herbarium, Boston, Mass.
S.G. - Library of the Surgeon General's Office, Washington, D. C.
Col. - Columbia University Library, New York, N. Y.

The index given at the end makes it possible to find quickly any dissertation cited, either by the original title or by the changed title in some cases given in the reprint.

Chronologically Arranged.

1. De Betula nana... N.Y.
Laurentius Mag. Klase.
b.
"Betula Nana. Resp. Laur. Klase."

Carolus Joh. Luut.
b.
"Flora Akeröensis. C. J. Luut."
Amoen. No. CLIV, 8:29.

23 Dec. 1769, Upsaliae, 20 p.

Hulth, p. 139, Pritzel 5514.

163. De Erica... L.C. N.Y. A.A. Bar.
Johan Adolph Dahlgren.
b.
"Erica. J. A. Dahlgren."
Amoen. No. CLV, 8:46.

19 Dec. 1770, Upsaliae, 2 f., 15, (1) p., 1 pl.

Hulth, p. 140, Rev., Pritzel 5515.

164. De Dulcamera... N.Y.
Georgius Hallenberg.
m.m.
"Dulcamera. G. Hallenberg."
Amoen. No. CLVI, 8:63.

29 May, 1771, Upsaliae, 14 p.

Hulth, p. 140, Pritzel 5516.

165. Pandora et flora rybensis... L.C.
Daniel Henr. Söderberg.

n.h.

"Pandora & Flora Rybensis. D. H. Soderberg."
Amoen. No. CLVII, 8:75.

26 Jun. 1771,Upsaliae, 23, (1) p.

Hulth, p. 140, Pritzel 5517.

166. Fundamenta testaceologiae... S.G.
Adolphus Murray.

z.

"Fundam. Testaceologiae. A. Murray."
Amoen. No. CLVIII, 8:107.

29 Jun. 1771,Upsaliae, 2 f., 43 p., 2 pl.

Hulth, p. 140, Rev.

167. De varia febrium intermittentium curatione... L.C. S.G.
Petrus C. Tillaeus.

m.

"Febrium intermittentium curatio varia.
P. Tillaeus." Amoen. No. CLXXX, 9:143.

11 Dec. 1771,Upsaliae, 56 p. 1 f.

Hulth, p. 141.

168. Respiratio diaetetica...
Jonas Ullholm.

m.

"Respiratio diaetetica. J. Ullholm."
Amoen. No. CLIX, 8:151.

29 Apr. 1772,Upsaliae, 1 f., 26 p.

Hulth, p. 142.

169. De haemorrhagiis ex plethora...
Ernest. J. M. ab Heidenstam.

m.

"Haemorrhagiae ex plethora. E. ab Heidenstam." Amoen. No. CLXXXI, 9:195.

23 May 1772, Upsaliae, 2 f., 32 p.

Hulth, p. 142.

170. Fraga vesca... L.C. N.Y. Bar.
Svenone Andr. Hedin.

b.

"Fraga vesca. S. A. Hedin."
Amoen. No. CLX, 8:169.

26 May 1772, Upsaliae, 2 f., 13, (1) p.

Hulth, p. 142, Pritzel 5518.

171. Observationes in materiam medicam... S.G.
Johannes Lindwall.

m.m.

"Observationes in Materiam medicam. J. Lindwall." Amoen. No. CLXI, 8:182.

5 Jun. 1772, Upsaliae, 1 f., 8 p.

Hulth, p. 142.

172. De suteris vulnerum in genere...
Christian Ern. Boecler.

m.

"Suturae vulnerum. C. E. Boecler."
Amoen. No. CLXXXII, 9:223.

27 Jun. 1772, Upsaliae, 21, (1) p.

Hulth, p. 142.

173. Planta cimicifuga... N.Y. J.C.
Johannes Hornborg.

b.

"Planta Cimicifuga. J. Hornborg."
Amoen. No. CLXII, 8:193.

Sept. 1774,Upsaliae, 1 f., 10 p., 1 pl.

Hulth, p. 148, Pritzel 9919.

174. De esca avium domesticarum...
Petrus Holmberger.

e.

"Esca avium domesticarum. P. Holmberger."
Amoen. No. CLXIII, 8:205.

/26/ Nov. 1774,Upsaliae, 1 f., 15 p.

Hulth, p. 148.

175. De Maro... N.Y. G.H. J.C.
Joh. Adolph. Dahlgren.

m.m.

"Marum. J. A. Dahlgren."
Amoen. No. CLXIV, 8:221.

3 Dec. 1774,Upsaliae, 18 p.

Hulth, p. 148, Pritzel 9920.

176. De Viola Ipecacuanha... N.Y.
Daniel Wickman.

m.m.

"Viola Ipecacuanha. D. Wickman."
Amoen. No. CLXV, 8:238.

16 Dec. 1744,Upsaliae, 12 p.

Hulth, p. 148, Pritzel 5521.
